

Luca Mainetti is an associate professor of software engineering and computer graphics at the University of Salento. His research interests include web design methodologies, notations and tools, services oriented architectures and IoT applications, and collaborative computer graphics. He is a scientific coordinator of the GSA Lab - Graphics and Software Architectures Lab and IDA Lab - Identification Automation Lab at the Department of

Innovation Engineering, University of Salento. He is the Rector's delegate at the ICT.

Luigi Patrono received his MS in Computer Engineering from University of Lecce, Lecce, Italy, in 1999 and PhD in Innovative Materials and Technologies for Satellite Networks from ISUFI-University of Lecce, Lecce, Italy, in 2003. He is an Assistant Professor of Network Design at the University of Salento, Lecce, Italy. His research interests include RFID, Internet of Things, Wireless Sensor Networks, embedded systems, and software architecture

for the IoT. He is Chair Organizer of some workshop and symposium focused on IoT topic. He is author of about 100 scientific papers published on international journals and conferences and four chapters of books with international diffusion.

Maria Laura Stefanizzi received her M.Sc. degree (cum laude) in Computer Engineering and her Ph.D. in Information Engineering from University of Salento (Italy), in 2012 and 2016, respectively. She is a Post-Doctoral Fellow with the IDA Lab - Identification Automation Laboratory at the Department of Innovation Engineering, University of Salento. Her main research activity concerned the integration of the most important Internet

of Things (IoT) enabling technologies and their use in order to develop novel Smart Environments and applications.

Luciano Tarricone received the Laurea degree (cum laude) in electronic engineering and the Ph.D. degree from Rome University La Sapienza, Rome, Italy, in 1989 and 1994, respectively. Since 1994, he has been a Researcher with the University of Perugia, Italy, and since 1998, he has been a Professore Incaricato of EM fields and EM compatibility. Since 2001, he has been a Faculty Member with the Department of Innovation Engineering,

University of Salento, Lecce, Italy, where he is a Full Professor of electromagnetic fields. He has authored over 300 scientific papers. His main contributions are in the modeling of microscopic interactions of EM fields and biosystems, and in numerical methods for efficient computer-aided design (CAD) of microwave circuits and antennas. He is currently involved in bioelectromagnetics, EM energy harvesting and wireless power transmission, novel CAD tools and procedures for MW circuits, RFID, and EM high-performance computing.
