Daniilo De Donno was born in Lecce, Italy, in 1983. He received the B.Sc. and M.Sc. degrees (cum laude) in telecommunication engineering from Politecnico di Milano, Italy, in 2005 and 2008, respectively, and the Ph.D. degree in information engineering from the University of Salento, Lecce, in 2012. In 2011, he was a Visiting

Researcher with the School of Electrical and Computer Engineering, Georgia Institute of Technology, Atlanta, GA, USA. He is currently a Post-Doctoral Fellow with the Innovation Engineering Department, University of Salento. His research interests include the design of parallel algorithms on graphics processors, computational RFID systems, and software-defined radio experimentation.

Maria Laura Stefanizzi graduated cum laude in Computer Engineering at University of Salento (Italy) in April 2012. Since January 2009 she collaborates with IDA Lab - IDentification Automation Laboratory at the Department of Innovation Engineering, University of Salento. Since July 2013 she is a PhD student at the University of Salento. Her

activity is focused on the design and validation through test beds on real devices of innovative applications and protocols aimed to reduce power consumption in Wireless Sensor Networks. She is also involved in the study of new solutions for the integration of RFID and WSN technologies.

Luca Catarinucci is an Assistant Professor in Electromagnetic Fields at the Department of Innovation Engineering, University of Salento, Italy. His research activity is mostly focused on the implementation of electromagnetic simulation tools, in the FDTD analysis of human–antenna interaction and in the electromagnetic characterisation of

materials. Further contributions deal with the time domain reflectometry (TDR) for the characterisation of fluids and in the radiofrequency identification (RFID) antenna and system design. He authored more than 50 papers on international and national journals and in international and national conferences and a chapter of a book with international diffusion.

Luca Mainetti is an associate professor of software engineering and computer graphics at the University of Salento. His research interests include web design methodologies, notations and tools, services oriented architectures and IoT applications, and collaborative computer graphics. He is a scientific coordinator of the GSA Lab - Graphics and Software

Architectures Lab and IDA Lab - IDentification Automation Lab at the Department of Innovation Engineering, University of Salento. He is the Rector's delegate at the ICT.

Luigi Patrono received his MS in Computer Engineering from University of Lecce, Lecce, Italy, in 1999 and PhD in Innovative Materials and Technologies for Satellite Networks from ISUFI-University of Lecce, Lecce, Italy, in 2003. He is an Assistant Professor of Network Design at the University of Salento, Lecce, Italy. His research interests include RFID,

EPCglobal, Internet of Things, Wireless Sensor Networks, and design and performance evaluation of protocols. He is Organizer Chair of the international Symposium on RFID Technologies and Internet of Things within the IEEE SoftCOM conference. He is author of about 70 scientific papers published on international journals and conferences and four chapters of books with international diffusion.

Luciano Tarricone received the Laurea degree (cum laude) in electronic engineering and the Ph.D. degree from Rome University La Sapienza, Rome, Italy, in 1989 and 1994, respectively. Since 1994, he has been a Researcher with the University of Perugia, Italy, and since 1998, he has been a Professore Incaricato of EM fields and

EM compatibility. Since 2001, he has been a Faculty Member with the Department of Innovation Engineering, University of Salento, Lecce, Italy, where he is a Full Professor of electromagnetic fields. He has authored over 300 scientific papers. His main contributions are in the modeling of microscopic interactions of EM fields and biosystems, and in numerical methods for efficient computer-aided design (CAD) of microwave circuits and antennas. He is currently involved in bioelectromagnetics, EM energy harvesting and wireless power transmission, novel CAD tools and procedures for MW circuits, RFID, and EM high-performance computing.
